Measuring Unit Test

Directions: Redraw the following 1" increment as accurately as possible. Each $\frac{1}{16}$ " increment should equal exactly $\frac{1}{2}$ " on the paper. Therefore, the total dimension of your drawing should be 8" in length. Please call out all $\frac{1}{16}$ th increments and properly reduce them. The height of your drawing is not important, but attempt to estimate it to 4" tall. You may draw by hand or use Pages on the computer.
